

ZCUT-80/ZCUT-150

Tape/Protect Film Dispenser

FEATURES

- Simply set length by digital counter
- Auto mode enables to cut tape continuously.
- Economic and useful to save production cost
- In Manual mode, take the cut tape and press Start Switch to dispense a new piece of tape.
- Greater efficiency on your taping work.
- Non adhesive materials are usable (Protection Tape, Aluminum Foil Tape etc.).
- Designed for heavy duty usage in long hours of time.
- Optional gear types to meet different types of tapes

SPECIFICATION

Model no	ZCUT-80	ZCUT-150
Automatic feed and cut	<input checked="" type="checkbox"/>	
Cutting Length	20-999mm	
Tape Width	8-80mm	8-150mm
Max. Roll Diameter	300mm	
Usable Tapes	Protective Film, Aluminum Foil, Craft, Cloth, Vinyl, Glass Cloth, Paper, Gummed, Mylar, Double-Sided, Combination Tape	
Tape Thickness	0.05~0.3mm	
Dimension (W*D*H)	190x230x140mm	260x230x140mm
Weight	5.5kg	6.5kg
Rated Voltage	220V/50Hz 25W	

OPTIONAL GEAR SELECTION

Metal feed-roller: use normal adhesive tape and protective film, the metal feed wheel hard to wear or damage during use.

Silicone feed-roller: use for strong adhesive tape and protective film, no imprint on the protective film, strong adhesive tape can prevent sticking, and the wheel is not easy to stick to glue.

Carbon-steel gear: wear-resistant and have a long service life. They are customized for strong adhesive tapes and can withstand a force of 120-150kg. They are widely used in various tapes and protective films.

OPTIONAL COMPARISON

Detail Configuration	Gear	Feed roller	Tolerable force	Applicable tape
Metal feed-roller + plastic gear (standard)	Plastic	Metal	60-80kg	Protective film/tape
Silicone feed-roller + plastic gear	Plastic	Silicone	60-80kg	Strong adhesive tape (double-sided tape/kraft tape, protective film...)
Metal feed-roller + carbon-steel gear	Carbon steel	Metal	120-150kg	Strong tensile (cloth tape/fiber tape)
Silicone feed-roller + carbon-steel gear	Carbon steel	Silicone	120-150kg	Strong tensile and strong adhesive tape (double-sided tape/kraft tape, protective film...)
